SUMMARY

Highly-motivated **Data Analyst** with a BSc. in Big Data and Data Analytics , equipped with a solid foundation in Python, SQL, and statistical analysis. Experienced in executing end-to-end data science projects, from exploratory data analysis to model deployment. Passionate about turning complex, high-volume data into actionable security and business insights.

EXPERIENCE

Data Science Intern (End-of-studies Project)

Feb 2026 – Jun 2026

GET WIRELESS

Tunis, Tunisia

Project : ML-based telecom fraud detection

- Executed an end-to-end telecom fraud detection project targeting SIMBox and Subscription fraud to minimize financial losses, strictly adhering to the CRISP-DM methodology.
- Preprocessed and engineered features from large-scale historical Call Detail Records (CDRs) to optimize data quality for exploratory data analysis and modeling.
- Trained, tuned, and evaluated an XGBoost multi-classification model, achieving high predictive accuracy in identifying complex fraud patterns on unseen data.
- Developed an interactive web application using Streamlit, deploying the trained XGBoost model to enable real-time fraud type prediction.

Data Science Intern

Jul 2025

STB Bank

Tunis, Tunisia

Project : Credit default risk modeling

- Developed a predictive credit default model using the CRISP-DM framework to analyze client data and assess potential financial risk.
- Cleaned, preprocessed, and engineered features from large client datasets to enhance predictive accuracy and handle missing or imbalanced financial data.
- Trained and optimized Machine Learning algorithms to effectively classify potential credit defaulters.

EDUCATION

Université Centrale Tunisie

Sep 2023 – Jun 2026

Bachelor of Science in Big Data and Data Analytics

Tunis, Tunisia

- Bachelor's Thesis: "ML-based telecom fraud detection"

TECHNICAL SKILLS

- Programming Languages: Python, C, C++, Java, SQL, JavaScript, TypeScript
- Machine Learning & Data Science: Scikit-learn , Pandas, Numpy, Matplotlib, Seaborn,...
- Tools: VSCode, Google Colab, Excel, MongoDB, Weka, Matlab

SOFT SKILLS

- Communication
- Collaboration
- Creativity
- Analytical thinking

LANGUAGES

English (C1) - German (A2) - Arabic (Native Proficiency) - French (Bilingual Proficiency)

INTERESTS

- Machine Learning
- Deep Learning
- Statistics
- Probability
- AI Safety
- Gaming
